

## Terrace Transit Future Service Plan Workshop I Summary

### Background

As part of the development of the Terrace Transit Future Service Plan, stakeholder workshops were held to develop service concepts and outline priorities for the plan.

### Priorities

Priorities identified during the stakeholder workshop are detailed in the graphic below.

Other key comments from the workshop included:

- More connections between routes (i.e. interlining routes, one seat rides)
- More accommodating trip times

### Next Steps

The input collected will help inform service planning priorities and concepts. Public engagement will be held in the spring of 2019 once options have been developed. Stay up to date by following
