

Saanich Transit Centre Project Update

Contract Awarded

Site preparation activities planned for this summer will start to move ahead now that a contractor is in place. Kinetic Construction will mobilize on site in July.

Permits and planning underway

BC Transit will soon apply for demolition permits from the District of Saanich for taking down the five buildings on site. Once permits are in place, a sequenced

approach to building demolition will occur. Tree protection measures will be implemented to protect municipal trees close to the site.

Tree Protection Example

What to expect onsite and upcoming events

In the coming weeks some crews will be onsite to survey the property and place wooden stakes to help identify legal property lines. Additional work with adjacent property owners will also take place in preparation for demolition activities this summer.

We look forward to hosting on-site open houses in June to provide an update on timing and construction activities. Stay tuned for dates and more updates.
