Project Update

Saving Valuable Items from Landfill

As part of our commitment to sustainability, we've worked with several local agencies to recover reusable items from the buildings ahead of demolition. This collaborative effort helps extend the life of materials and furnishings that still have practical use. Thank you to the Beacon Community Service BEAMS employment and training program for their help, as well as Our Place Society, Salvation Army,

Veterans Food Bank of Victoria, Victoria Hospice, and Habitat for Humanity Restore for helping put salvaged building materials and furniture to good use in our community.

Final Tree Work This Week

Final tree and shrub removal will start today and be completed by Friday. You may notice crews working within the root protection fencing. This is planned work to

prune and remove some remaining smaller trees and shrubs. Removed trees and shrubs will be chipped and reused locally as mulch.

Kinetic Construction Moving On Site

Site office trailers are now located at the former handyDART location. Kinetic will oversee all onsite activities starting Tuesday, August 18. Commerce Circle will be the main entry and exit point from the site.
