Project Update

Fortis Gas Work on Glanford Avenue – Week of September 7, 2026

In preparation for the safe demolition of the former Wilson's building at 4196 Glanford Avenue later this month, FortisBC will cap an existing gas line along Glanford Avenue. This work is expected to take one day to complete, and will occur between Tuesday, September 8 and Friday, September 11.

To safely carry out this work, there may be traffic disruptions between 9 a.m. and 3:30 p.m. The northbound sidewalk and bike lane will be closed in this block. Priority will be given to emergency vehicles, transit, municipal, and mail delivery services. Please expect short delays or consider an alternate route.

Please watch for and follow directions from traffic control personnel in the area.

Walls Come Down

Demolition of the two-storey building at 4196 Glanford Avenue is planned to begin the week of September 14, 2026. Built in the 1980's, the building has been home to several transportation companies over the years and was most recently occupied by Wilson's Transportation.

Hazardous materials have been removed. Demolition of the structure is expected to take approximately three weeks, followed by removal of the foundation, which is expected to take three weeks.

The second building to be demolished will be the former handyDART facility on Commerce Circle.
